

BRAKE FLUID DOT-4

REXOIL DOT4 Brake Fluid is based on polyethylene glycol ether technology to provide the highest level of brake and clutch. It has a minimum boiling point of 250°C and designed for use in both disc and drum brake systems, for clutch system and in other hydraulic systems for which DOT 4, DOT 3 and SAE J1703 fluids are recommended. It shows high performance even in extreme temperatures caused by friction brake systems.

Properties

- Extended life and reliability of brake system components.
- High boiling point.
- Consistent and safe brake performance under severe braking pressure.
- Suitable for vehicles with discs brakes on the front & drum brakes on the rear, or disc brakes all round.
- Also suitable for vehicles where ABS is fitted.

Approvals and Specifications

- SAE J1703
- FMVSS 116 DOT 4
- SAE J1704
- ISO 4925

Technical Properties

Test	Method	Typical Values
Density (15 °C), g/cm ³	ASTM D1298	1.040 – 1,085
Kinematic Viscosity (100°C) [cSt]	ASTM D445	Min. 1,8
Boiling point, °C	SAE J1703	Min. 250
Wet Equilibrium Reflux Boiling Point, °C	SAE J1703	Min. 155
pH	ASTM D193	7,4 - 9,4
